Mohammad Abdalrazzak

Full Stack JavaScript Developer

mohrazzak7@gmail.com • mohrazzak.tech • Linkedin • +963995587028

As a Full Stack Engineer with a passion for creativity and problem-solving, I thrive in fast-paced environments. With over 2 years of experience in web development, primarily at startups, I've sharpened my skills in backend development. I've tackled a variety of challenges, from business logic and e-commerce to SaaS applications and user dashboards.

EXPERIENCE

Unifi Solutions, *Software Engineer* ⧉   04/2024 – Present | Remotely

Led backend development for hotel management ensuring real-time notifications with Firebase, optimized system performance improving response times and user experience, maintained high server availability and seamless operations, collaborated with teams to design and launch new features, and enhanced security with robust authentication mechanisms.

EasyApp, *Software Engineer*   10/2023 – 12/2023 | Remotely

Developed Node.js backend for seamless customer-restaurant interactions, boosting efficiency by 40%, Improved data retrieval speed by 60% with MongoDB and ensured service uptime using Azure cloud, Reduced server downtime by 30% and increased user interaction by 25% with Firebase notifications, Strengthened security with WhatsApp authentication, increasing user trust by 50%

PROJECTS

QBite, *Back End Engineer*   04/2024

Node.js, NestJS, MySQL, Prisma, Swagger/OpenAPI, Redis, i18n, Ubuntu.

In my role as CEO and Backend Engineer, I led the innovation to replace paper menus with an eco-friendly e-menu system. This involved overcoming challenges in scalable solutions and optimizing multi-language support. I implemented backend infrastructure, managed databases, handled caching, and documented APIs using Swagger. Collaborating closely with the frontend team, I ensured seamless integration and even incorporated QR-code scans to enhance the menu display. q-bite.net ⧉ Github ⧉

Turkish universities, *Back End Engineer*   01/2023

Node.js, MySQL, Express.js.

A platform for students in Turkey seeking educational opportunities. It enables searches for universities and majors, and provides news, resources, and a fully dynamic control panel.

SKILLS

Programming Languages:
JavaScript | TypeScript | C++ | Java | PHP

Back End:
NodeJS | Express | Nest | FireBase | FCM | Azure | AWS | Ubuntu | Cloudinary | WhatsApp API | Socket.IO |

Front End:
HTML | CSS | React | Svelte | SvelteJS | MUI | BootStrap | TailWind

Databases and ORMs:
SQL | MySQL | MongoDB | NoSQL | Mongoose | Redis | Sequelize | Prisma | Mongoose | TypeORM

Others: Swagger | Postman | Jira | Git | GitLab | GitHub | I18n

EDUCATION

Computer Science, *University of Aleppo*   2021 – 2026 | Aleppo, Syria

Known as Informatics Engineering locally, currently pursuing Computer Science at a top Syrian university.
Actively engaged in ICPC problem-solving challenges, honing coding skills for a impactful tech career.
